EDUCATION AND STUDIES

- Secondary with a bachelor's degree with orientation in business management and administration. March.2013 / Dec.2017 Instituto Asprella, Baradero, Buenos Aires Argentina.
- Industrial maintenance technician. March.2019 / Dec.2021 UNSAdA, Buenos Aires Argentina.
- Full stack developer. Oct.2022 / March.2023 Henry Bootcamp.

TECHNOLOGIES AND TOOLS

- HTML
- CSS
- Javascript
- React
- Redux
- ChakraUI
- NodeJs
- TypeScript
- Express
- PostgreSQL
- Sequelize
- Jira

LANGUAGES

- Spanish (Native)
- English (Intermediate)

PROYECTS

Full Stack Web Developer - Stock application jul. 2023 - aug. 2023

Freelance experience. Remote.

I led the design and development of an inventory management application with real-time product tracking. Our primary focus was on delivering an intuitive user experience by incorporating UI/UX design principles. Additionally, we prioritized the creation of robust APIs in the backend, which we seamlessly integrated into the frontend to access various data sources. The application underwent thorough testing, including unit and integration testing, to ensure its reliability and functionality. This meticulous approach enabled us to detect and resolve issues early in the development cycle, resulting in a stable and dependable product. Key features included:

- Inventory Management: Search, filtering, and sorting functionalities with Javascript.
- Cloud Image Storage: Integration with Cloudinary for secure image uploads.
- Frontend Styling: Utilized Chakra UI for cohesive design.
- Backend APIs: Developed APIs in Node.js and Express for data retrieval and manipulation.
- Authentication and Security: Implemented a secure authentication system.

Full Stack Web Developer - PF VerdeVolver feb. 10/2023 -mar. 10/2023

Academic experience.

Henry Bootcamp, Buenos Aires, Argentina.

During my tenure at Henry Bootcamp, I collaborated with a team of developers in designing and developing an application focused on raising awareness about recycling and environmental conservation. This project encompassed various functionalities, from creating APIs in the backend to implementing unit testing to ensure code reliability. Together, we aimed to create an intuitive user experience by integrating UI/UX design principles. Additionally, we managed the integration with external services, such as:

- Languages and Technologies: JavaScript, React, React-Redux, Chakra UI (Frontend). Node.js, Express, PostgreSQL, Sequelize (Backend and Database).
- External Integrations: MercadoPago, Cloudinary.
